BlueLevel Technologies Expands Information Access Through Facebook!

Peru, IL, United States - December 14, 2009 - Social media and communities are becoming filled people from industry. Every day automation professionals and those involved with bulk solid handling processing and storage are connecting together for work purposes on Facebook and the other pop social communities. BlueLevel Technologies Managing Director, Joe Lewis, comments that "our expertise needs to be given freely back to the industries that have helped us gain that expertise and social media is one way to do that".

BlueLevel Technologies Facebook fan page can be found at www.facebook.com/pages/BlueLevel-Technologies/97182916337. Become a fan and discover what is new and happening in the world of level measurement and monitoring. Lewis comments further saying that "we are not using Facebook for self-promotional advertising. Far from it, rather, it is an important new way of allowing people to follow and discuss what's new and happening in level measurement, should anyone choose to". Lewis further states, "Facebook and social media in general is an outlet for our industry experts to share their knowledge and service potential users of level measurement and monitoring instrumentation".

BlueLevel Technologies brings 35 years of process measurement and control experience and knowledge to its *Just Level* service strategy. *Just Level* is designed to anticipate, meet and exceed the needs of BlueLevel Technologies customers and their industries bringing decades of process measurement and control expertise directly to the user.

Visit the BlueLevel Technologies innovative website at www.blueleveltechnologies.com and become an elite associate member of the BlueLevel Technologies team to begin your experience of *Just Level*. For more information contact Joe Lewis, Managing Director, at 888-262-2662, 815-224-2224 or by email joe@blueleveltechnologies.com

BlueLevel Technologies Non-contact radar device designed specifically for solids? Yes, that's what is claimed. Krohne is a reputable company so their claims may be true. However, Krohne is distracted like many other suppliers in that they are not just level, they are spread thin across a variety of flow measurement technologies in ad...[Read More](#)

OPTIWAVE 6300 C (Level Measurement) en
Source: www.krohne.com
OPTIWAVE 6300 C is a contactless 2-wire 24...26 GHz Radar (FMCW) meter for distance, level and volume measurement of powders, granulates and other solids. Due to its continuous wave generation and the small radar beam angle, this FMCW Radar does not require antenna aiming....

BlueLevel Technologies When you need to measure the contents of a silo or tank, how do you go about doing it? What is it that you really want to know? You want to know the amount of material in some commodity unit. The next question... what is that commodity unit. Many times it is weight, sometimes volume. But how do we measure it most ...[Read More](#)
