PRESS RELEASE

FOR IMMEDIATE RELEASE

Bin Level Indicator Handles High Temperatures

Rock Falls, IL, United States – September 30, 2010 - “We are pleased to announce the availability of our new *High Temperature Model RH/RHX Bin Level Indicator*.” says Joe Lewis, Managing Director. “This allows the Model RH/RHX to be used in a wider range of applications than ever before, including those where process temperatures can be up to 750°F (399°C) on a continuous basis!” says Lewis.

The *High Temp Model RH/RHX* is a rotary paddle bin level indicator with extension, air purge, mounting plate and mounting seal of complete stainless steel construction for excellent corrosion resistance in high temperature environments. In addition, all Model RH/RHX units UNIQUELY combine a group of features in an economical package not available elsewhere, including 1) Flexible Folding Paddles, 2) SUPER BRIGHT locally visible LED’s indicate material normal and alarm conditions, 3) DPDT relay output fail-safe on power failure, 4) four bearings for smooth shaft rotation, 5) automatic motor shutoff when material is present, and 6) food grade materials of construction.

BlueLevel Technologies’ Joe Lewis, with 35 years of process measurement and control experience and knowledge indicates that “rotary paddle technology is the most resilient technology used to detect the presence and absence of a wide variety of powders and bulk solids”. “Since their inception in the 1930’s these mature bin level indicators are the most universal in their use, easy to understand, reliable and provide very high value”, Lewis’ says.

BlueLevel provides *Just Level* service strategy. *Just Level* is designed to anticipate, meet and exceed the needs of BlueLevel Technologies customers and their industries bringing decades of process measurement and control expertise directly to the user.
