PRESS RELEASE

FOR IMMEDIATE RELEASE

Explosionproof Model RHX Bin Level Indicator

Rock Falls, IL United States – June 10, 2011 - “Many industries require instrumentation certified for use within hazardous vapor and dust areas. We are pleased to announce the availability of the Model RHX Rotary Paddle Bin Level Indicator for hazardous locations. The Model RHX is certified to CSA and UL standards for use in both Class I and II locations, Division 1 & 2, Groups C, D, E, F and G.” says Joe Lewis, Managing Director.

“The Model RHX is a bin level indicator used for high, low or intermediate level control and plugged chute detection in grain processing, milling, chemical and many other industries. It provides a unique combination of features including explosionproof certified and NEMA Type 4X enclosure, DPDT relay output fail-safe on power failure, automatic motor shutoff, four shaft bearings and LED indicators of normal and alarm status (locally visible on Model RH units only)”, says Lewis’.

BlueLevel’s *Just Level* focus and support service strategy provides you with personalized expert service and consultation with every call and email, rapid response to all questions, and the fastest order processing and shipment available. *Just Level* is designed to anticipate, meet and exceed the needs of BlueLevel Technologies customers and their industries bringing decades of process measurement and control expertise directly to every customer contact.
